📍 Islamabad, Pakistan

Education

MS in Data Science

National University of Sciences and Technology (NUST) (GPA: 3.25 / 4.0)

Sept. 2024 – Sept 2026

Islamabad, Pakistan

BS in Computer Science

Karakoram International University (GPA: 3.44 / 4.0)

Sep. 2018 – Oct. 2022

Gilgit, Pakistan

Publications

• NUST CodeIntel at SemEval-2026 Task 13: Cross-Domain Detection of Machine-Generated Code via Stylometric Features and Transformer Models.

Azher Ali, Mehwish Fatima.

Association for Computational Linguistics (ACL), 2026.

• Riazi-8B: An Urdu Large Language Model for Mathematical Reasoning .

Azher Ali, Raja Khurram Shahzad, Seemab Latif, Mehwish Fatim.

Submitted to The 2nd International Conference on Advancement and Innovation in Artificial Intelligence and Machine Learning (AI2ML), 2026. Under review.

Experience

AI/ML Engineer

Cikatech Inc.

May 2024 – February 2025

Bavet, Cambodia

- Built LLM-based AI applications using LangChain, LangGraph, and CrewAI for multi-agent workflows and automation.
- Fine-tuned Large Language Models using Hugging Face and Unsloth to improve performance and efficiency.
- Developed Retrieval-Augmented Generation (RAG) systems with vector databases for semantic search and knowledge retrieval.
- Applied Reinforcement Learning techniques (DDP, GRPO) to enhance model reasoning and response quality.

Data Scientist & AI/ML Engineer

Upwork & Fiverr

August 2023 – April 2026

Islamabad, Pakistan

- Built and maintained scalable AI apps using Python (Flask, FastAPI, Streamlit) and JavaScript
- Designed and deployed ML/DL models (Bert, llama, Qwen) to enhance app functionality and automate decisions.
- Worked with tools like Hugging Face, TensorFlow, Unsloth, Vllm, Transformers, OpenAI API, PyTorch, LangChain, MongoDB, MySQL, and Scikit-learn for model development
- Applied techniques like RAG, LoRA, QLoRA, GRPO, DDP, and PEFT for efficient model adaptation.
- Collaborated on deploying AI solutions in real-world applications.(AWS, Azure, etc)

Data Scientist Intern

10Pearls

April 2026 – June 2026

Remote, Islamabad, Pakistan

- Developed and trained machine learning models using Python and Scikit-learn, applying data preprocessing, feature engineering, and model evaluation techniques.
- Implemented MLOps workflows using DVC and MLflow for dataset versioning, experiment tracking, and reproducible model training.
- Automated machine learning pipelines with GitHub Actions, enabling continuous integration and streamlined model validation workflows.
- Collaborated with cross-functional teams using Git and GitHub, contributing to code reviews and maintaining scalable, production-ready ML workflows.

Software Engineer

TechZoid (Pvt.) Ltd

Sep 2021 – July 2023

Islamabad, Pakistan

- Built full-stack applications using Node.js (Express) for backend and React Native for cross-platform mobile development.
- Developed RESTful APIs with FastAPI, ensuring high performance and scalability.
- Integrated ML/DL models (e.g., LSTM, CNN, CV) into backend services to enable intelligent app features.
- Improved deployment efficiency by implementing CI/CD pipelines and automated testing.

Projects

SmartDiet — AI-Powered Nutrition Question Answering with LangChain & LLMs

- Developed an end-to-end RAG pipeline using LangChain for nutrition-focused question answering.
- Integrated FAISS/Chroma for semantic search over clinical and dietary documents.
- Preprocessed unstructured data using custom loaders and text chunking techniques.
- Technologies: LangChain,Ollama, OpenAI GPT, HuggingFace Embeddings, FAISS, Chroma, Streamlit, Python

Fine-Tuning Large Language Models for Medical Domain

- Implemented supervised fine-tuning (SFT) of LLaMA/Gemma using domain-specific medical datasets.
- Applied parameter-efficient techniques (LoRA/QLoRA) to reduce GPU memory usage while maintaining accuracy.
- Optimized training using Hugging Face Transformers, Unsloth, Vllm, Accelerate, and PyTorch Lightning.
- Conducted evaluation with ROUGE-L and BLEU metrics to measure generation quality.
- Technologies: Hugging Face, Transformers, PEFT, LoRA, QLoRA, PyTorch Lightning, Weights & Biases, CUDA

Production-Ready MLOps Pipeline — MLflow Tracking, DVC Versioning & Kubernetes Deployment

- Built and managed end-to-end machine learning workflows using DVC and MLflow.
- Containerized ML applications with Docker and deployed scalable models using Kubernetes/KServe.
- Explored AWS SageMaker and Kubeflow for managing machine learning pipelines and orchestration.

Technical Skills

Skills: Python R SQL JavaScript AWS/Azure/GCP TensorFlow PyTorch Hugging Face LangChain FastAPI
Flask Streamlit REST APIs Power BI MySQL MongoDB Docker Git Unsloth LangGraph NLP LLMs Deep
Learning Machine Learning Generative AI Statistical Analysis Vector CrewAI RAG & Agents FastApi

Professional Certifications & Courses
